

Project Overview

- **Theme:** Cricket
- **Tech Stack:** React.js, Tailwind CSS, Git
- *Contributions*
- **Frontend Development:** Designed and implemented the **tournament page UI**.
- *My Inputs*
- Collaborated with UI/UX developers to design **tournament page UI** in Figma.

Summary

Over this period, I focused on setting up the project, understanding its structure, and getting familiar with **Tailwind CSS**, **React.js**, and **Git** to contribute effectively. I collaborated with the team and UI/UX developers to finalize the **main tournament page design** in Figma, implemented the layout, and pushed updates to the repository.

I resolved multiple UI issues, including ensuring responsiveness across various screen resolutions. Later, I transitioned to building the **modal component**—researching design references, implementing the structure, adding a **text area** for long descriptions, and fixing related UI bugs. Enhancements for the modal are currently in progress to improve both its design and functionality.

I also took ownership of the **Login Page UI**, redesigning it based on the new Figma layout and introducing new components as per updated requirements. Additionally, I made styling improvements such as **font adjustments**, **scrollbar implementation**, and addressed the **bold text rendering issue**.

Recently, I worked on enhancing the overall UI of the **Edit Tournament**, **Tournament**, and **Dashboard** components to ensure a more polished and consistent user experience across the application

Time sheet

Date	Task	Status
18-Mar	Cloned the project, analyzed the folder structure, and initiated learning Tailwind CSS and basic React.js.	Completed
19-Mar	Collaborated with the team to finalize the main tournament page design.	Completed
20-Mar	Designed and enhanced the tournament page layout, then pushed the updates to the repository.	Completed
21-Mar	Resolved UI issues related to screen resolution adjustments.	Completed
22-Mar	OFF	OFF
23-Mar	OFF	OFF
24-Mar	Began working on the modal design and conducted research on UI designs based on the Figma reference with the help of umakant and omkar.	In Progress
25-Mar	Implemented the Figma design as per the requirements.	Completed
26-Mar	Fixed UI issues related to the modal design.	Completed
27-Mar	Added a text area field to accommodate long descriptions in the modal.	Completed
28-Mar	Initiated enhancements for the modal component.	In Progress
31-Mar	Created login form design as per the figma	Completed
1-Apr	Updated whole UI of the login page and added new component as per new design	Completed
3-Apr	Changed font size ,style and added scrollbar in tournaments page	Completed
8-Apr	Implemented bold text issue	Completed
9-Apr	Enhanced UI of Edit tournament, tournament, and dashboard	Completed
