

Full Stack Development

Alvin Pauly

Project: Jio.com

Tech Stacks/Tools:

- **ReactJS:** ReactJS is used to design and develop single page applications like YouTube, it's a JavaScript based library which is open source and highly robust.
- **Spring Boot:** Spring Boot is used to Deliver production grade backend services and it is also very secure.
- **Next.JS:** Next.js is an open-source web development framework created by the private company Vercel providing React-based web applications with server-side rendering and static rendering.
- **Go Lang:** Go language is used to design highly robust applications because of it's fast compilation process and one can also develop microservices using GO.

Language: Java, JavaScript and GO

Workflow:

- Requirement Analysis & Planning
- Frontend Development (Client-Side)
- Backend Development (Server-Side)
- Database Management
- Maintenance & Optimization
