

Product Requirements Document (PRD): Cricket-Themed Team Performance Web Application

1. Overview

1.1 Product Name

Cricket-Themed Team Performance Web Application

1.2 Purpose

This application is designed to offer a gamified and interactive platform for tracking and visualizing team performance. Leveraging a cricket-themed interface, it simplifies performance evaluation, fosters engagement, and enhances collaboration across teams.

1.3 Target Audience

- **Team Members (Players):** Gain insights into individual contributions and overall team performance.
- **Team Leads (Coaches):** Manage team activities, track progress, and update relevant data.
- **Stakeholders:** Evaluate team effectiveness and productivity through structured insights.

2. Features & Functionality

2.1 Player View

- **Team Photo Page:** Displays a group photo of all team members.
- **Tournaments Page:** Showcases activities across various projects (e.g., MPC, Namo AI, Namo Transcript, and Namo Revamp), including:
 - Project details.
 - Issues identified and resolved.
 - Performance scores per project.
- **Scoreboard Page:** Displays individual statistics, including:
 - Total contributions.
 - Activity scores.
 - Courses completed.

2.2 Coach View

- **Secure Login Access:** Restricted access for team leads.
- **Dashboard Management:**
 - Add, edit, and remove tournaments.
 - Update player statistics.
 - Modify team details (logo, group photo, and general information).
- **Performance Insights:**
 - Track team progress over time.

- Identify top contributors.
- Generate reports for evaluation.

3. User Roles & Permissions

Role	Permissions
Player	View personal stats, team performance, and tournament details.
Coach	Manage tournaments, update team info, and modify player data.

4. Technical Requirements

- **Frontend:** React.js, TailwindCSS for a dynamic UI.
- **Backend:** Node.js with Express.js for API management.
- **Database:** MongoDB for storing team details, performance data, and tournament records.
- **Authentication:** Secure login for controlled access.
- **Hosting:**
 - Frontend: Vercel
 - Backend: Vercel/Render for scalability and performance.

5. Performance Metrics

- **User Engagement:** Active user count and login frequency.
- **Feature Adoption:** Usage statistics of key features like scoreboard, tournaments, and dashboards.
- **Data Accuracy:** Timeliness and correctness of performance updates.
- **System Uptime:** 99.9% platform availability.
- **Feedback Score:** User ratings and reviews on UI/UX and functionality.

6. Milestones & Timeline

Milestone	Deadline
Requirement Finalization	10/03/2025
Wireframe Generation	12/03/2025
User Story Formation	13/03/2025
UI/UX Design Completion	14/03/2025
Backend Development Completion	24/03/2025
Frontend Integration	26/03/2025
User Acceptance Testing	28/03/2025
Final Deployment	31/03/2025

7. Success Criteria

- Seamless user experience with intuitive navigation.
- High user engagement and adoption.
- Accurate and real-time performance tracking.
- Positive feedback from stakeholders and end-users.
