Title: Introductory Video Playback and Landing Page with Role Selection

Description:

As a user, I want to watch an introductory landing video , with an option to skip it. If I choose to skip, I should be redirected to a landing page that introduces Team MPC with relevant information i. e: Logo , Description , Tagline and role selection options, so I can either watch the video or quickly proceed to select my role from the landing page .

Acceptance Criteria:

Video Playback:

- The introductory video should auto-play immediately when the user lands on the page.
- A visible "Skip" button should be displayed during video playback.
- If the user clicks the "Skip" button, the video should stop, and the user should be redirected to the landing page.
- If the user does not click the "Skip" button, the video should automatically stop after a predetermined time (i. e: 15 seconds).

Landing Page Content:

Once the video stops (either by skipping or automatically after the set time), the user should be redirected to the landing page.

The landing page should display the following:

- The logo of Team MPC.
- A main heading that introduces Team MPC.
- A subheading: "MPC Biweekly March 2025".

Role Selection:

- The landing page should have two clearly labeled buttons: **“I am Coach”** and **“I am Player”**.
- Clicking on "I am Coach" should redirect the user to the coach's specific user flow.
- Clicking on "I am Player" should redirect the user to the player's specific user flow.

3) Title : Navigation (Next Button & Expandable Ball Component)

Description : As a user, I want to seamlessly navigate through different pages (based on the flow defined)using next page’s redirection button on every page for forward navigation and also want to have quick access to all navigation links through an expandable ball-like component, so that I can easily navigate through different pages

Acceptance Criteria:

- Each page should include a forward navigation button labelled as the “page name” for forward navigation (based on the flow defined).

example : For navigation to tournament page , navigation button will be labelled as “Tournament” .

- The navigation ball-like component should be visible on all pages except “Landing” page . and it includes all the navigation links like “Exit” , “Restart” , “Scores” , “Home” , “Tournaments” , “Team” and “Dashboard”(Coach specific)
- The ball-like component expands when clicked, showing all relevant navigation elements .
- By default, the navigation elements will display only icons. When the user hovers over any icon, a tooltip will appear, providing a clear label for each navigation element.

4) Title : Exit Page (Coach and Player)

Description : As a user (Coach/Player), I want to land to an exit page , upon completing the flow, that displays a "Thank You" static text

Acceptance Criteria:

- After completing the flow (whether as a coach or player), the user is shown a page with the static text - “Thank You!” along with navigation component and AI bot.

5) Title : AI Bot

Description: As a user, I want an AI bot to provide assistance by offering detailed information about the team, its members, scores, leads, and other relevant data, so that I can easily retrieve the specific details I'm interested in.

Acceptance Criteria :

For the user access , AI Bot floating icon will be present on all pages except “landing” page .

Chatbot Interface:

- The chatbot interface displays the name "**MPC Chatbot**" at the top of the interface along with an “input” field at the bottom and a “send” icon next to it to submit the prompt .
- Three default prompts will be displayed to the user. When a user clicks on any of these prompts, it will automatically populate the input field, and the bot will begin generating a response for the selected prompt. The default prompts will disappear once the user selects a prompt or enters a custom one.
- Once user enters a prompt in the input field and submits , an animated loading indicator appears till the response is generated and displayed

Prompt and Response Display:

- The **user's prompt** is displayed on the **right side** of the chat interface along with a **profile icon** representing the user.
- The **response generated by the chatbot** is displayed on the **left side** with a **bot icon** next to it, clearly differentiating the responses from the user's prompts.

Scroll and Collapse Functionality:

- A **vertical scrollbar** is available on the right side to scroll through the chat history.
- A **cross icon** is available to collapse the chatbot interface when not in use.

1. Case 1: Valid User Query

Chatbot is trained to generate data based on the following contexts :-

- MPC Project
- Current Team member's details including :

● Domain Name	● Employee ID	● Previous Team	● Qualification	● Hobbies	● Home Town	● Release interest
---------------	---------------	-----------------	-----------------	-----------	-------------	--------------------

- If the user submits a valid prompt within the context , appropriate response will be generated .
- User can get the details of the employees by entering Emp ID , Name , Domain Name or any custom prompts including any of the three listed above.
- Example prompts for fetching employee data :

Prompt	Response
San (Name is not complete)	Couldn't find the result for the name "San" Did you mean 'Sanjeev2.prajapati'
Sanjeev2.prajapati	Sanjeev2.Prajapati's data shows that he works in the JPMA team, has a B. Tech (Hons.) qualification, his hobbies include Travelling and Poetry, his hometown is Rudrapur Uttarakhand, and his release interest is Data Science. His current team is MPC.
55099222	Sanjeev2.prajapati
Sanjeev Prajapati	Based on the provided employee data, Sanjeev Prajapati's other details are: * **EmployeeID:** 55093222 * **Previous Team:** JPMA * **Qualification:** B.Tech(Hons.) * **Hobbies:** Travelling, Poetry * **Home Town:** Rudrapur Uttarakhand * **Release interest:** Data Science * **Current Team:** MPC
Who is Sanjeev ?	Sanjeev Prajapati is an employee with Employee ID 55093222 . His previous team was JPMA , he has a B. Tech(Hons.) qualification , his hobbies include travelling and poetry , his hometown is Rudrapur (Uttarakhand) and his current team is MPC

- MPC Details :

User can get the MPC details like

● Expanded form	● Different views	● Features
-----------------	-------------------	------------

Example prompts :

1. What is full form of MPC
2. Explain MPC in detail

Case 2: Default Response (No Direct Answer Available)

- If entered query is out of context and system is unable to provide a direct response to the user's query . In that case , user is provided with a default response .

Prompt	Response
Any out of context prompt like : How did the reforms influence India's growth and integration into the global economy?	Default response : This document does not contain information about India's economic reforms or their impact on growth and global integration. The provided text describes the functionality of a software application, "Mera Saansad," and its testing procedures.

Case 3: Profanity

- If the user's query contains profanity or inappropriate content , then bot will detect the profanity and will provide a default response for the profanity in that case .
