

Backend Development

Project: CWMS(RR report)

Tech Stack:

- **Spring boot:** Spring Boot is a Java framework that makes it easier to create and run Java applications. It simplifies the configuration and setup process, allowing developers to focus more on writing code for their applications.
- **ReactJS:** ReactJS is a component-based JavaScript library used to build dynamic and interactive user interfaces. It simplifies the creation of single-page applications (SPAs) with a focus on performance and maintainability.

Tools:

- **Eclipse IDE:** Eclipse is an integrated development program for developing various computer applications using especially Java language as well as others, including C/C++, Python, PERL, Ruby, and many more.
- **Visual Studio Code:** Visual Studio Code (VS Code) is a popular and versatile Code editor that's highly recommended for React development.

Languages: JAVA, JavaScript and JSX

Workflow:

1. Standup Meeting
2. Tasks Assigned
3. Deadline decided
4. Understanding Task
5. Provide Solution
6. Share Progress in Standup Meeting
