

Inputs in MPC Bi-Weekly Project:

Ideation:

Based on the low fidelity wireframes shared by the product, made iterations about the design scheme/ color scheme/ theme of the project.

Worked on the design iteration for the below listed pages:

1. Player cards (individual player card component)
2. All players page
3. Player side: Tournament page
4. Admin side: add tournament page
5. Admin side: add player page
6. Login page (status: in progress)
7. Credits page (status: ideation)

Discussion with developers for feedback and suggestions about the designs.

Post design implementation with the developers: take inputs and iterate the designs.

Design	Feedback & Suggestions	Status
Initial design (mid fidelity wireframing) post discussion with product	Product	Completed
Design iterations for players side: 1. Player card (all players page) 2. Player card details	Frontend & Backend devs	Completed
Design iteration for Admin side: 1. Add tournament 2. Add player	Frontend & Backend devs	In-progress
Design iteration credits page	Frontend & Backend devs	In-progress
Design iteration login page	Frontend & Backend devs	In-progress
