

Backend Developer

Developer- Kunal Kulthe

Team- JioOnePay

Tech Stack: SpringBoot

Developer Responsibilities & Workflow

1. Scrum Meeting

- Share completed work and discuss any blockers.
- Align with the team on upcoming tasks and priorities

2. Task Management

- Tasks assigned primarily by the **manager**
- Core responsibilities:
 - **Debugging issues** in the codebase
 - **Writing unit tests** to ensure code quality.

3. Collaboration for Issue Resolution

- Work closely with:
 - **Senior developers**
 - **Product teams**
- Purpose:
 - Clarify requirements
 - Resolve complex technical issues

4. Production Issue Handling

- Handle **only relevant production issues**
- Prioritized if:
 - Issue is related to a feature I worked on
 - Immediate user impact is observed.

5. Code Review Process

- Regularly review teammates' code
- Ensure:
 - Code is clean and follows standards
 - No bugs or issues are missed

6. Free Time

- Use free time to learn, improve the code, help teammates, or enhance existing features.
