

Project Work Documentation

Role: Front-End Developer (React.js, Tailwind)

Inputs:

1. Created the basic layout of the Tournament Page, which was later revamped according to the new design.
2. Integrated the backend of the Tournament Page.
3. Worked on UI enhancements and debugging.

Summary:

Over this period, I started by cloning the project, understanding its folder structure, and learning Tailwind CSS. I then began working on the layout and design of the Tournament Page. Throughout this process, I encountered several issues and bugs but managed to resolve them successfully. Additionally, I implemented various UI enhancements on the page. Finally, I integrated the backend of the Tournament Page to complete its functionality.

Timesheet:

Date	Task	Status
18-Mar	Cloned the Project/Understood the Folder structure/Started Learning Tailwind	Completed
19-Mar	Started with the Layout and Design of Tournaments Page	Pending
20-Mar	Completed the Initial Basic Layout of the Tournament Page and Pushed it	Completed
21-Mar	Debugging	Completed
22-Mar	OFF	OFF
23-Mar	OFF	OFF
24-Mar	On Leave	On Leave
25-Mar	On Leave	On Leave
26-Mar	Debugging	Completed
27-Mar	Integrated Backend of the Tournament Page	Completed
28-Mar	Started working on Modal Component Enhancements	In Progress
