

Project Overview

- **Theme:** Cricket
- **Tech Stack:** React.js, Tailwind CSS, Git
- *Contributions*
- **Frontend Development:** Designed and implemented the **tournament page UI**.
- *My Inputs*
- Collaborated with UI/UX developers to design **tournament page UI** in Figma.

Summary

Over this period, I focused on setting up the project, understanding its structure, and getting familiar with **Tailwind CSS and React.js** to work efficiently. I collaborated with the team to finalize the **main tournament page design** and then worked on improving its layout before pushing the updates.

I also tackled **UI issues**, ensuring the page looked good across different screen resolution. After that, I shifted my focus to designing the **modal component**, researching UI ideas from **Figma**, implementing the design, and fixing any related UI issues. Additionally, I added a **text area field** to support longer descriptions inside the modal.

Right now, I'm working on **enhancing the modal component further** to improve its functionality and overall user experience.

Time sheet

Date	Task	Status
18-Mar	Cloned the project, analyzed the folder structure, and initiated learning Tailwind CSS and basic React.js.	Completed
19-Mar	Collaborated with the team to finalize the main tournament page design.	Completed
20-Mar	Designed and enhanced the tournament page layout, then pushed the updates to the repository.	Completed
21-Mar	Resolved UI issues related to screen resolution adjustments.	Completed
22-Mar	OFF	OFF
23-Mar	OFF	OFF
24-Mar	Began working on the modal design and conducted research on UI designs based on the Figma reference with the help of umakant and omkar.	In Progress
25-Mar	Implemented the Figma design as per the requirements.	Completed
26-Mar	Fixed UI issues related to the modal design.	Completed
27-Mar	Added a text area field to accommodate long descriptions in the modal.	Completed
28-Mar	Initiated enhancements for the modal component.	In Progress
